

AM.I stands for unapologetically losing yourself in that moment where music explodes into an array of color and feel. Whilst writing and composing her own typical melodic sound, AM.I enters a world that is entirely her own. And by slowly conquering the Belgian nightlife and beyond, she allows everybody who's looking for a magical night to enter said world.

Starting in 2016, she started producing original tracks with a sharp and dark edge that reintroduces melodic techno music in a whole new, fresh and unexpected manner.

She's been rumbling the stages of Tomorrowland and other festivals. Trembling in many clubs in Berlin, Club Vaag Belgium and soon more to come. Gathering EP's with Set About, Ballroom Records, a new level will be unlocked this year.

Prepare for an immersive experience that will introduce you to darkness as well as light, closely interwoven with each other – giving a powerful female immersive energy.
